Ministry of the Environment of the Czech Republic
Future of Sustainability in the Tropics

Vladislav Smrž
Ministry of the Environment of the Czech Republic

*International Urban Sustainability & Green Building Conference 2017*
*Plenary session*
Kuala Lumpur, 12 October 2017
How the Czech Republic can contribute to the sustainability of the tropics?

Climate zones of the world

By altering our lifestyle
Key success factors
Tropics

• Sustainable agriculture and forestry
Key success factors
Non-tropics

- Public-awareness raising on **impacts of consumption choices**
  - Preference of local products to ensure
    - short supply chains (less transport => low emissions)
    - affordability of traditional food supplies for indigenous people
  - Preference of products that do not harm unique tropical ecosystems and biodiversity
Key success factors
Non-tropics

- Sustainable tourism
- More responsibility for the waste produced
- Embrace circular economy principles to prevent excessive raw materials mining
