

# INSIDE THE BOX

Architecture is often times perceived as just “buildings” but we believe that there is more to just the functionality and aesthetic of the built form. Architect Fabian Tan explores the past that informs this ideology and substance beneath the surface, revealing the intentions behind the firm’s prominent projects. In these hectic and overly complicated times, restraint and reduction serve as his guiding philosophy to create buildings of subtle beauty.

## SATURDAY, 28 MAY 2022

9:00 AM - 11:00 AM | Virtual via Zoom

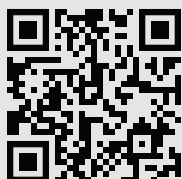

\*Voila House and Bewboc House by Ar Fabian Tan

# SPEAKER PROFILE

## Mr. Sim Chee Liang

More than 25 years' experience in glass processing industry with a successful background in Sales and Marketing venues. Currently the Executive Director of Ajiya Safety Glass Sdn. Bhd., a nation's pioneer in Malaysia's architectural glass processing industry which its principal activities include manufacturing of safety and security architectural glasses under the renowned brand name of AJIYA. Elected as malaysiaGBC President for terms 2021-2023 during the recent election. He believes that glass play an integral role not only in architectural and designs, but also contributing to a more sustainable built environment.

## Ar. Fabian Tan

Fabian Tan is the principal of Fabian Tan Architect (FTA), an architectural practice in Kuala Lumpur specialising in unique residential designs. He graduated with Honours from the University of South Australia in 1997 where he received his Bachelor of Architecture. He has previously worked in Kuala Lumpur & Melbourne, handling a wide range of developments that include residential, institutional, commercial and interior projects. Fabian explores creativity beyond architecture, dabbling in the creation of art pieces, furniture and installations which have been featured in art exhibitions.

Since the establishment of FTA in 2012, his firms' works have garnered positive attention from local and international media. Most notable publications include Archdaily, Dezeen, Domus, Habitusliving, Design Anthology, Architecture Malaysia, Malaysia Tatler, The Star Newspaper, The Edge and others. Recently, the firm was featured as one of the twenty emerging architectural practices in the Wallpaper Architects' Directory 2021, celebrating the magazine's 25th Anniversary Issue.

Fabian's approach to design has been one that involves evolution and flexibility. Ideas that are formed in the conception of a project never imposes anything on the site. Throughout, conventions are constantly reassessed, resulting in individual variations of concepts meant for a specific context. He believes that the essence and consistency of a space is a whole that reflects its constituent parts such as light, material, volume, and relationships. In this hectic and overly complicated times we exist in, restraint and refinement serve as his guiding philosophy to create spaces of subtle beauty.

## Dr. Jegathish Kanadasan

Dr. Jegathish Kanadasan completed his Bachelor in Civil Engineering at Universiti Tenaga Nasional (UNITEN) in the year 2011 before enrolling directly into a Ph.D programme at Universiti Malaya. He received his Ph.D in Concrete Technology from the Faculty of Civil Engineering in 2016. His area of expertise include self-compacting concrete, green concrete, concrete admixture and concrete durability. Currently, Jegathish Kanadasan is the Manager in Business and Product Development at YTL Cement. He is an investigator at the Buildcon Concrete Sdn. Bhd., whilst working closely with YTL Cement, YTL Slag Cement and Batu Tiga Quarry which are all the subsidiary companies of YTL Cement. He is actively carrying out research on the cement, aggregates and admixtures to develop new types of concrete to suit the industrial application.
